

Navigating the Dispatch Interface

This page is a current work in progress

Navigating and Understanding the Dispatch Interface

The Dispatch interface is possibly the most important interface in RouteGenie, aside from working on pre assigns you will spend the majority of your time working out of this interface.

While a lot of the stuff is straight forward it is also extremely complex and rich with features and options.

The screenshot displays the RouteGenie Dispatching interface. On the left is a sidebar with navigation options: Dashboard, Custom Dashboard, Dispatching (selected), Orders, Scheduling, Vehicles, Users, Passengers, Payers, Reports, Settings, and Payments. The main area features a map with various vehicle icons labeled 'Van 1' through 'Van 16'. Below the map is a search bar and filters for Status (10/10), Mode (8/8), Zone (3/3), Attention (43/43), and Driver Group (2/2). A table at the bottom lists orders with columns for Order ID, Vehicle, Driver, PU Time, Approx. PU, Approx. DO, Vios, Passenger, PU Address, DO Address, and Payer. The table shows several orders, including one for '80178 (UA)' and another for '51489 (AS)'.

Order ID	Vehicle	Driver	PU Time	Approx. PU	Approx. DO	Vios	Passenger	PU Address	DO Address	Payer
80178 (UA)	Vehicle ID		08:50							
80177 (UA)	Vehicle ID		11:00							
51489 (AS)	Van 13	Joel Berg	08:12	08:13	09:33	43				
45318 (AS)	Van 13	Joel Berg	08:13	09:00	09:31	41				
41049 (AS)	Van 17	Robert Ortiz	08:27	08:46	08:13	8
